

Entity relationship diagrams: Bookstore logical model

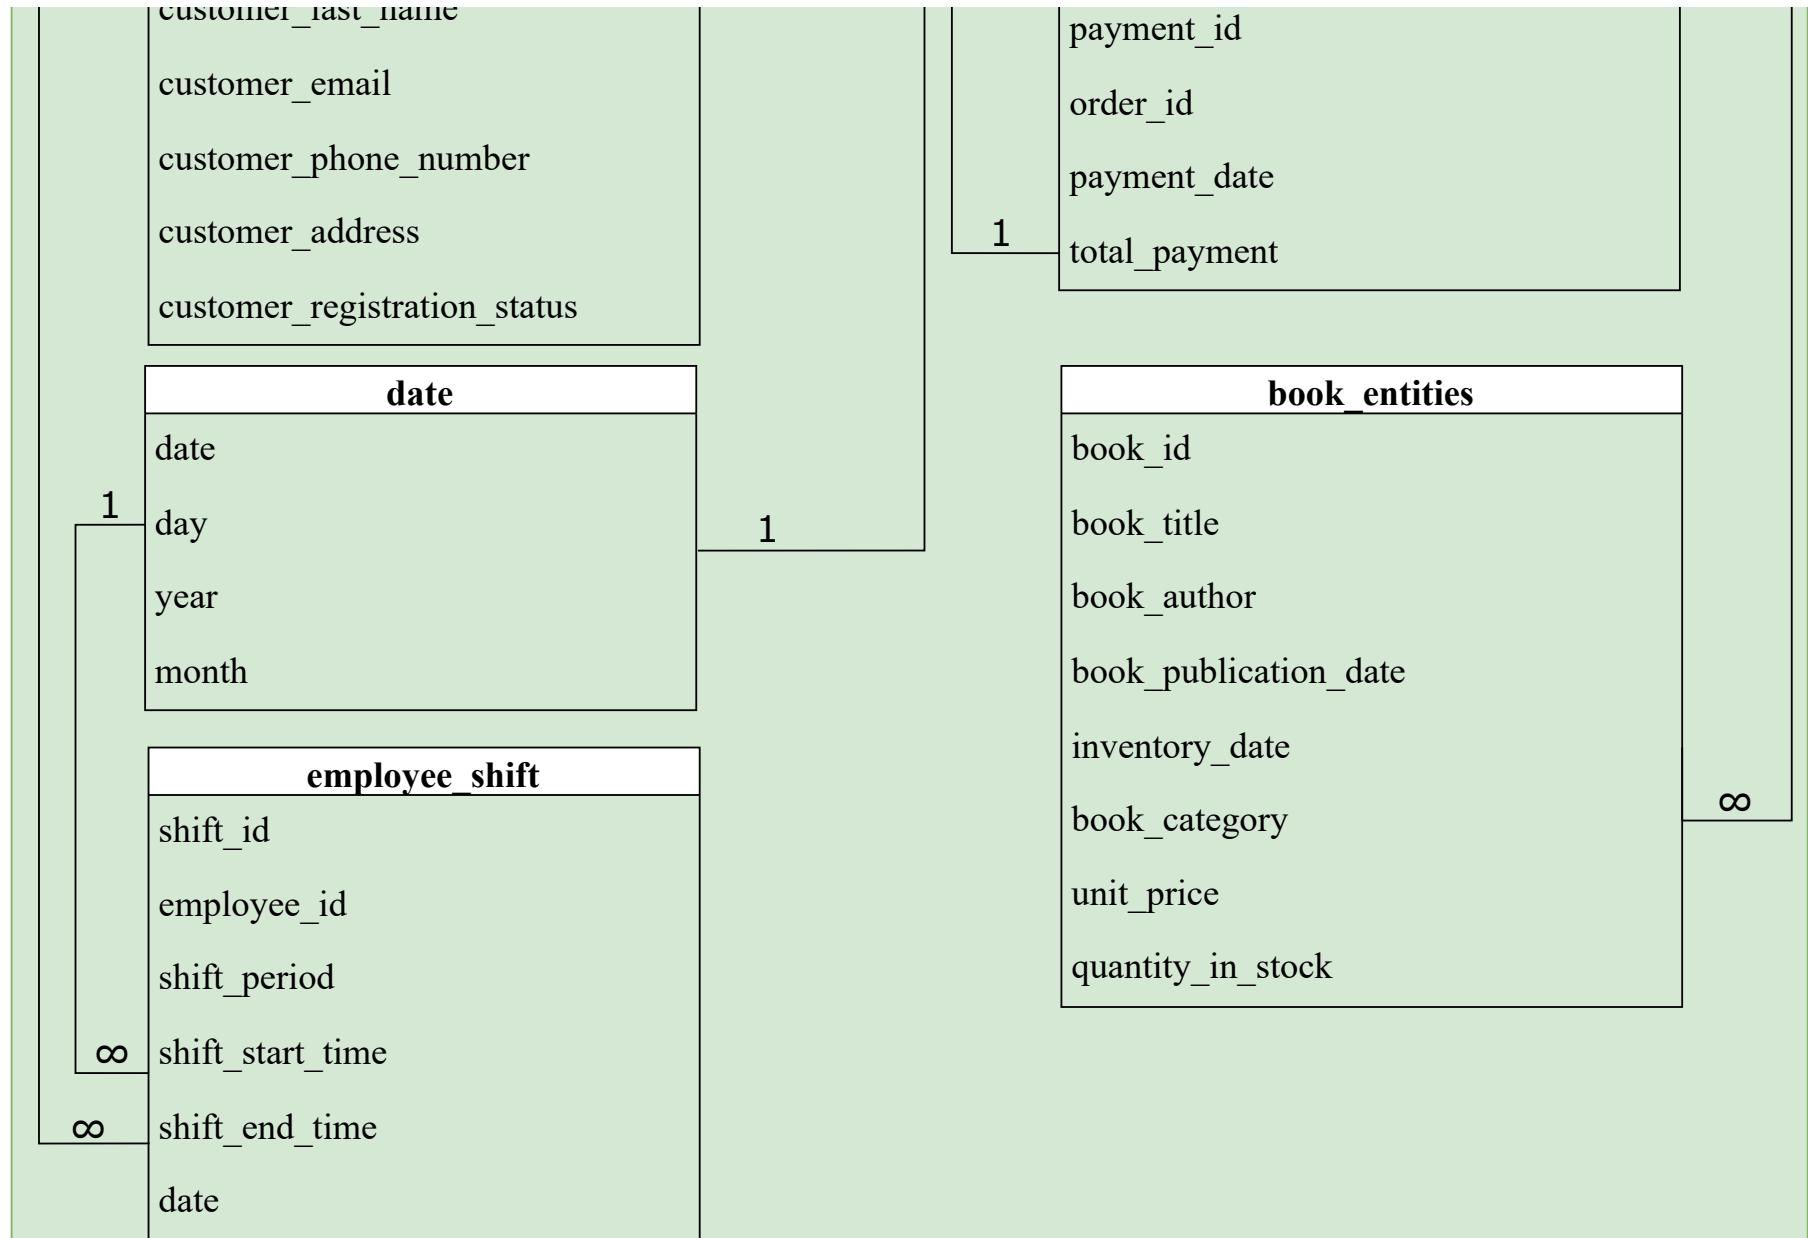

Prompt 1

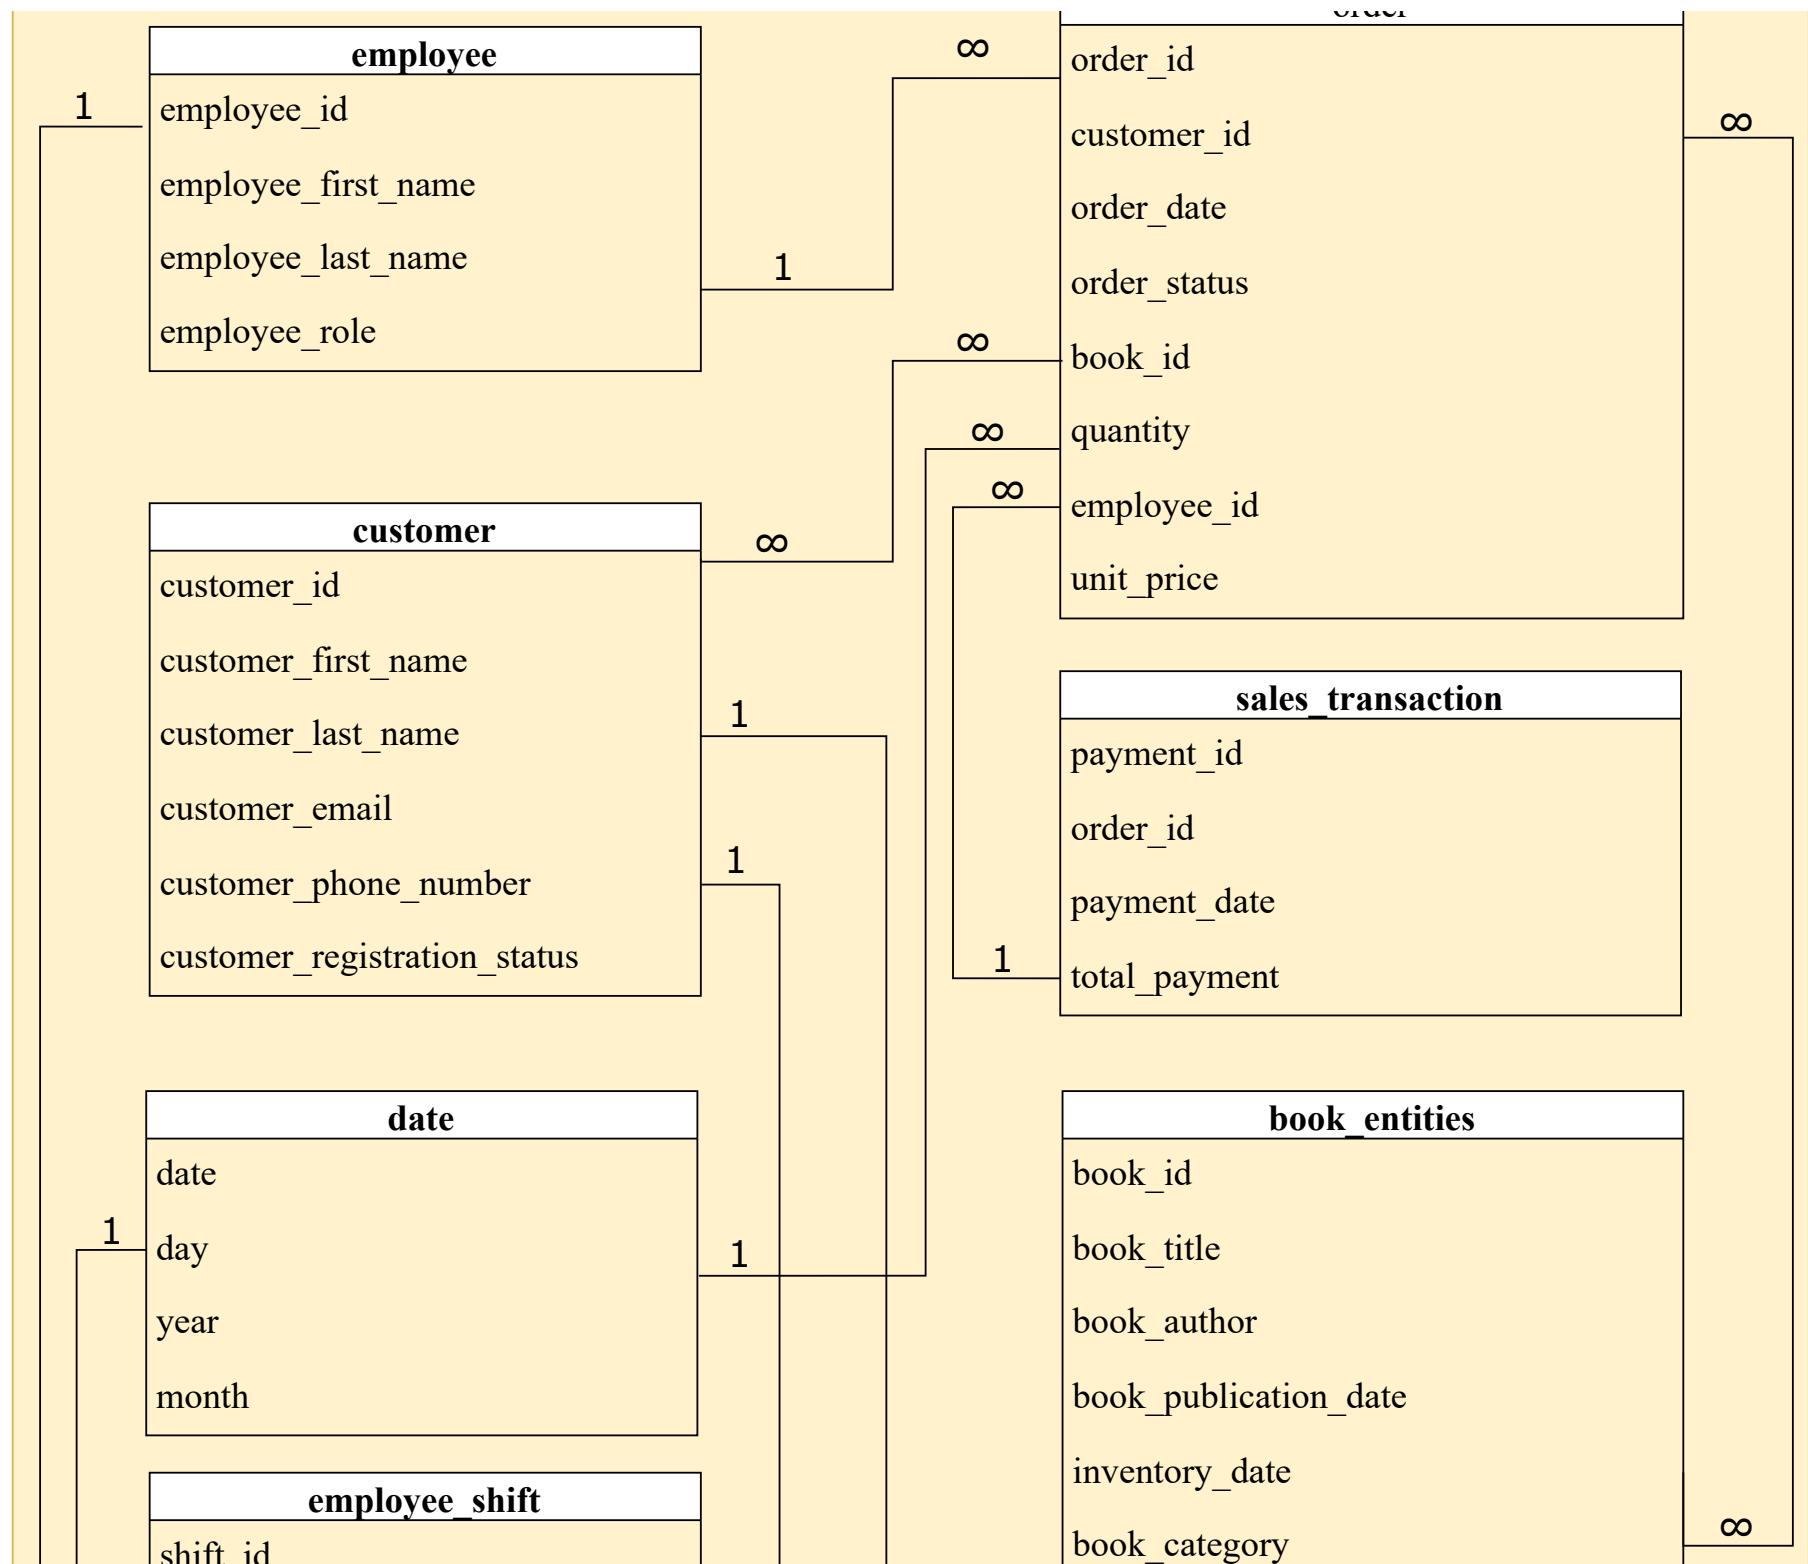

Prompt 2

Prompt 3

order

	shift_id	
	employee_id	
	shift_period	
∞	shift_start_time	
∞	shift_end_time	
	date	

customer_address_type1	
customer_id	
address_line1	
city	
state_province	1
postal_code	
country	
update_status	

customer_address_type2	
customer_id	
address_id	
address_line1	
city	
state_province	
postal_code	
country	
effective_start_date	
effective_end_date	

Type 1 overwrites while Type 2 changes and retains history of customer addresses
